Subject Index

Adjustable Dynamic Response™, traditional thermoplastic AKOs *versus*, 84
African populations, amputation among rural Kenyan children and adolescents, 157
Ambulatory efficiency, comparison of "stubby" prosthesis and C-Leg, bilateral transfemoral amputation, case report, 140
Amputation
gait analysis of asymmetries, Lower Extremity Ambulation Feedback System, 31
lower limb, bilateral, phantom pain, phantom sensation and spine pain, Iraq-Iran War victims, 162
lower limb 1994–2006, functional outcomes, 152
osteomyoplastic, pressures within prosthetic socket during walking, case report, 127
rural Kenyan children and adolescents, 157
transfemoral, outcome and gait characteristics with osseointegrated fixation, 11
transfemoral, comparison of "stubby" prosthesis and C-Leg prosthesis, case report, 140
transfemoral, gait symmetry using C-Leg or 3R60 prosthetic knees, 106
transfemoral, kinetic differences using power knee and C-Leg, 237
transfemoral and transtibial, spatial temporal parameters of gait, 26
transradial, forearm muscle activation patterns, electromyography of amputees, 244
transtibial, residual limb management, bandaging *versus* residual limb sock, 194
transtibial, K3 Promoter™ prosthetic foot reduces metabolic cost of walking, 113
transtibial, nonvascular, effect of Talux® prosthetic foot, 43
transtibial bilateral, Talux® prosthetic foot multidimensional motion in, 53
vacuum pressure analysis using vacuum suspension, prosthetic sockets, 172
Amputees
Dynamic Roentgen Stereophotogrammetric Analysis of prosthetic kinematics during strenuous activity, 91
forearm muscle activation patterns, electromyography of normal and transradial amputees, 244
gait symmetry using C-Leg or 3R60 prosthetic knees, transfemoral amputation, 106
kinetic differences using power knee and C-Leg, 237
survey of individuals wearing lower limb prosthetics, 257
Ankle-foot orthoses
effect on gait of stroke patients, 78
ground reaction, child with lumbosacral myelomeningocele and tibial torsion, 222
stiffness estimates and loading conditions, 211
traditional thermoplastic *versus* Adjustable Dynamic Response™, 84
trimline severity and rotational stiffness, 204

Balance confidence, comparison of "stubby" prosthesis and C-Leg, bilateral transfemoral amputation, case report, 140
Bandaging, residual limb management, bandaging *versus* residual limb sock, transtibial amputation, 194
Biomechanics
gait symmetry using C-Leg or 3R60 prosthetic knees, transfemoral amputation, 106
unilateral transtibial amputation, K3 Promoter™ prosthetic foot reduces metabolic cost of walking, 113
Body segment parameters, potential errors in gait analysis with inverse dynamic calculations in lower limb loss, 56
Braces, ankle foot orthoses and gait, stroke patients, 78

C-Leg
comparison of "stubby" prosthesis and, bilateral transfemoral amputation, case report, 140
gait symmetry using 3R60 prosthetic knees or, transfemoral amputation, 106
kinetic differences using power knee and C-Leg, amputees, 237
Core strengthening, spinal stabilization exercises and gait after lower limb loss, 230
Crawling, parameters of, children with prosthetic knees, 21
Crouch gait, ground reaction AFO, child with lumbosacral myelomeningocele and tibial torsion, 222

Dynamic models, analysis and, hydraulic intelligent prosthetic legs, 177
Dynamic Roentgen Stereophotogrammetric Analysis, analysis of prosthetic kinematics during strenuous activity, 91

Editor's comments, 1, 77, 145, 203
Electrical stimulation, functional, efficacy in chronic hemiplegia and MS, 166
Electromyography, forearm muscle activation patterns, electromyography of normal and transradial amputees, 244

Feedback, gait analysis of asymmetries, Lower Extremity Ambulation Feedback System, 31
Food and Drug Administration, U.S., regulation of prosthetic research development and testing, 121
Foot, Talux® prosthetic foot in nonvascular transtibial amputation, 43
Footwear, metatarsalgia, reducing metatarsal head pressure with shoe modification, 37
Force sensing, gait analysis of asymmetries, Lower Extremity Ambulation Feedback System, 31
Forearm, muscle activation patterns, electromyography of normal and transradial amputees, 244
Functional electrical stimulation, efficacy in chronic hemiplegia and MS, 166
Functional outcomes
gait characteristics and, with osseointegrated fixation, transfemoral amputation, 11
lower limb amputations 1994–2006, 152

Gait analysis
ankle foot orthoses and, stroke patients, 78

asymmetries, Lower Extremity Ambulation Feedback System, 31
functional outcomes and, with osseointegrated fixation, transfemoral amputation, 11
ground reaction AFO, child with lumbosacral myelomeningocele and tibial torsion, 222
infusion of technology into every day clinical care, 2
parameters of crawling in children with prosthetic knees, 21
potential errors with inverse dynamic calculations in lower limb loss, 56
pressures within prosthetic socket during walking, osteomyoplastic amputation, case report, 127
spatial temporal parameters of, transfemoral and transtibial amputation, 26
spinal stabilization exercises and gait after lower limb loss, 230
stiffness estimates and loading conditions, ankle-foot orthoses, 211
symmetry, unilateral transtibial amputation, K3 Promoter™ prosthetic foot and metabolic cost of walking, 113
symmetry using C-Leg or 3R60 prosthetic knees, transfemoral amputation, 106
Talux® prosthetic foot, multidimensional motion in bilateral transtibial amputee, 53
Talux® prosthetic foot in nonvascular transtibial amputation, 43
GAITRite®, traditional thermoplastic AKOs *versus* Adjustable Dynamic Response™, 84
Government regulation, FDA regulation of prosthetic research development and testing, 121
Ground reaction, AFO, child with lumbosacral myelomeningocele and tibial torsion, 222

Hemiplegia, chronic, efficacy of functional electrical stimulation in MS and, 166
Hemiplegic gait, ankle foot orthoses and gait, stroke patients, 78
Hydraulic dampers, intelligent prosthetic legs, dynamics modeling and analysis, 177

Interfacial pressures, pressures within prosthetic socket during walking, osteomyoplastic amputation, case report, 127
Internal prostheses, Dynamic Roentgen Stereophotogrammetric Analysis of prosthetic kinematics during strenuous activity, 91
Inverse dynamics, potential errors in gait analysis with inverse dynamic calculations in lower limb loss, 56

Joint centers, potential errors in gait analysis with inverse dynamic calculations in lower limb loss, 56

K3 Promoter™ prosthetic foot, reduces metabolic cost of walking, unilateral transtibial amputation, 113
Kenyan populations, amputation among rural Kenyan children and adolescents, 157
Kinematics
kinetic differences using power knee and C-Leg, amputees, 237
prosthetic, Dynamic Roentgen Stereophotogrammetric Analysis of, during strenuous activity, 91
Knee-ankle-foot orthosis, follow-up in spinal cord injury patients, 146
Knees
hydraulic intelligent prosthetic legs, dynamics modeling and analysis, 177
prosthetic, parameters of crawling in children, 21

Link-segment model, potential errors in gait analysis with inverse dynamic calculations in lower limb loss, 56
Loading, stiffness estimates and, ankle-foot orthoses, 211
Locomotion, unilateral transtibial amputation, K3 Promoter™ prosthetic foot reduces metabolic cost of walking, 113
Lower Extremity Ambulation Feedback System, analysis of gait asymmetries, 31
Lower limb amputations
1994–2006, functional outcomes, 152
bilateral, phantom pain, phantom sensation and spine pain, Iraq-Iran War victims, 162
elevated vacuum suspension and residual limb volume, 252
Lower limb prosthetics
gait analysis of asymmetries, Lower Extremity Ambulation Feedback System, 31
microprocessor, review of current state of the art, 183
survey of individuals wearing, 257
Lower limbs
clinimetrics of timed walking events, orthotic and prosthetic rehabilitation, 62
hydraulic intelligent prosthetic legs, dynamics modeling and analysis, 177
infusion of technology into every day clinical care, 2
loss of, potential errors in gait analysis with inverse dynamic calculations in, 56
loss of, spinal stabilization exercises and gait, 230
transfemoral and transtibial amputation, spatial temporal parameters of gait, 26
vacuum pressure analysis using vacuum suspension, prosthetic sockets, 172

Medical devices, FDA regulation of prosthetic research development and testing, 121
Metabolic costs, of walking, reduced by K3 Promoter™ prosthetic foot, unilateral transtibial amputation, 113
Metatarsalgia, reducing metatarsal head pressure with shoe modification, 37
Microprocessor controls, lower limb prosthetics, review of current state of the art, 183
Mobility, functional outcomes, lower limb amputations 1994–2006, 152
Mortality rates, functional outcomes, lower limb amputations 1994–2006, 152
Motion analysis, kinetic differences using power knee and C-Leg, amputees, 237
Motor development, parameters of crawling in children with prosthetic knees, 21
Multidimensional foot kinematics, Talux® prosthetic foot, in bilateral transtibial amputee, 53
Multiple sclerosis, efficacy of functional electrical stimulation in chronic hemiplegia and, 166
Myelomeningocele, lumbosacral, child with tibial torsion and, AFO ground reaction, 222
Myoelectric control, forearm muscle activation patterns, electromyography of normal and transradial amputees, 244

Neuroprostheses, functional electrical stimulation, efficacy in chronic hemiplegia and MS, 166

Orthotic technology, infusion into every day clinical care, 2

Osseointegrated fixation, functional outcomes and gait characteristics with, transfemoral amputation, 11
Osteomyoplastic amputation, pressures within prosthetic socket during walking, case report, 127
Outcome assessments
clinimetrics of timed walking events, orthotic and prosthetic rehabilitation, 62
comparison of "stubby" prosthesis and C-Leg, bilateral transfemoral amputation, case report, 140
elevated vacuum suspension and residual limb volume, lower limb amputations, 252
functional outcomes, lower limb amputations 1994–2006, 152
gait characteristics and, with osseointegrated fixation, transfemoral amputation, 11
lower limb amputations 1994–2006, 152
vacuum pressure analysis using vacuum suspension, prosthetic sockets, 172
Output actuation, lower limb prosthetics, review of current state of the art, 183

Pain
metatarsalgia, reducing metatarsal head pressure with shoe modification, 37
phantom pain, spine pain and, bilateral lower limb amputations, Iraq-Iran War victims, 162
Patient satisfaction, survey of individuals wearing lower limb prosthetics, 257
Patient selection, knee-ankle-foot orthoses, follow-up in spinal cord injury patients, 146
Pediatric patients
amputation among rural Kenyan children and adolescents, 157
lumbosacral myelomeningocele and tibial torsion in, AFO ground reaction, 222
parameters of crawling in children with prosthetic knees, 21
Perioperative complications, functional outcomes, lower limb amputations 1994–2006, 152
Phantom pain, phantom sensation, spine pain and, bilateral lower limb amputations, Iraq-Iran War victims, 162
Phantom sensation, phantom pain, spine pain and, bilateral lower limb amputations, Iraq-Iran War victims, 162
Plantar pressure, metatarsalgia, reducing metatarsal head pressure with shoe modification, 37
Power leg, kinetic differences using C-Leg and, amputees, 237
Prosthetic knees, parameters of crawling in children, 21
Prosthetic legs, hydraulic intelligent, dynamics modeling and analysis, 177
Prosthetic sockets, vacuum pressure analysis using vacuum suspension measurement tool, 172
Prosthetic technology, infusion into every day clinical care, 2
Prosthetic use, functional outcomes, lower limb amputations 1994–2006, 152
Prosthetics, forearm muscle activation patterns, electromyography of normal and transradial amputees, 244
3R60 Prosthetic knees, gait symmetry using C-Leg or, transfemoral amputation, 106

Rehabilitation
functional outcomes, lower limb amputations 1994–2006, 152
gait symmetry using C-Leg or 3R60 prosthetic knees, transfemoral amputation, 106
knee-ankle-foot, follow-up in spinal cord injury patients, 146
orthotic and prosthetic, clinimetrics of timed walking events, 62
spinal stabilization exercises and gait after lower limb loss. 230
Research, FDA regulation of prosthetic research development and testing, 121
Residual limb management, transtibial amputation, bandaging *versus* residual limb sock, 194
Residual limb volume, elevated vacuum suspension and, lower limb amputations, 252

Self-Assessment Examinations, 75, 138, 150, 220
Sit-to-stand, kinetic differences using power knee and C-Leg, amputees, 237
Socket residual limb kinematics, Dynamic Roentgen Stereophotogrammetric Analysis of prosthetic kinematics during strenuous activity, 91
Sockets
prosthetic, internal pressures during walking, osteomyoplastic amputation, case report, 127
vacuum pressure analysis using vacuum suspension measurement tool, 172
Spinal cord injury, follow-up in, knee-ankle-foot orthosis and, 146
Spinal stabilization exercises, gait and, after lower limb loss, 230
Spine pain, phantom pain, phantom sensation and, bilateral lower limb amputations, Iraq-Iran War victims, 162
Standing, knee-ankle-foot, follow-up in spinal cord injury patients, 146
StepWatch Activity Monitor, traditional thermoplastic AKOs *versus* Adjustable Dynamic Response™, 84
Stiffness
estimates of, loading conditions and, ankle-foot orthoses, 211
rotational, trimline severity and, ankle foot orthoses, 204
Stroke
ankle foot orthoses and gait, stroke patients, 78
functional electrical stimulation, efficacy in chronic hemiplegia and MS, 166
"Stubby" prosthesis, comparison of C-Leg prosthesis and, bilateral transfemoral amputation, case report, 140

Talux® prosthetic foot
effect of, in nonvascular transtibial amputation, 43
multidimensional motion in bilateral transtibial amputee, 53
Technology, infusion of technology into every day clinical care, 2
Temporal-spatial parameters, pressures within prosthetic socket during walking, osteomyoplastic amputation, case report, 127
Tibial torsion, child with lumbosacral myelomeningocele and, AFO ground reaction, 222
Timed up and go, clinimetrics of timed walking events, orthotic and prosthetic rehabilitation, 62
Transfemoral amputation
bilateral, comparison of "stubby" prosthesis and C-Leg prosthesis, case report, 140
gait symmetry using C-Leg or 3R60 prosthetic knees, 106
kinetic differences using power knee and C-Leg, 237
outcome and gait characteristics with osseointegrated fixation, 11
transtibial amputation and, spatial temporal parameters of gait, 26
Transradial amputation, forearm muscle activation patterns, electromyography of amputees, 244

Transtibial amputation
bilateral, Talux® prosthetic foot multidimensional motion in, 53
nonvascular, effect of Talux® prosthetic foot, 43
residual limb management, bandaging *versus* residual limb sock, 194
transfemoral amputation and, spatial temporal parameters of gait, 26
unilateral, K3 Promoter™ prosthetic foot reduces metabolic cost of walking, 113

Vacuum pressure analysis, using vacuum suspension measurement tool, prosthetic sockets, 172
Vacuum suspension
elevated vacuum suspension and residual limb volume, lower limb amputations, 252
vacuum pressure analysis using, prosthetic sockets, 172
Velocity, parameters of crawling in children with prosthetic knees, 21
Veterans, phantom pain, phantom sensation and spine pain, bilateral lower limb amputations, Iraq-Iran War victims, 162

Walking
clinimetrics of timed walking events, orthotic and prosthetic rehabilitation, 62
K3 Promoter™ prosthetic foot reduces metabolic cost of, unilateral transtibial amputation, 113
Talux® prosthetic foot, multidimensional motion in bilateral transtibial amputee, 53
War-related injury, phantom pain, phantom sensation and spine pain, bilateral lower limb amputations, Iraq-Iran War, 162
